3252 / 1948 TO CONFIRM MINUTES OF PREVIOUS MEETING &
SIGN THEM

Agreed

3253/1949 REPORTS OF THE COUNTY COUNCILLOR AND CITY
COUNCILLORS.

**Report by Cllr. Alan Greenwell to Yealand Redmayne Parish
Council**

This will be my first Parish Council meeting since being elected to the
District Council. I am looking forward to meeting Yealand Storrs and
Redmayne villagers and learning more about village activities and needs
– and to working with the Parish Council. You can contact me on 01524
701610 or agreenwell@lancaster.gov.uk.

1) Maintaining Council Houses

I have been in contact with some residents of The Meadows & Meadow
Close to check that maintenance by the Housing Dept is good. Some
issues (windows not properly sealed) have been repaired; others,
especially in Meadow Close, are pending.

Also the 5mph speed sign by the childrens' play area at the entrance to Well Lane and The Meadows needs replacing; delivery vans drive too fast.

2) Towards Zero Carbon by 2030

At last the District Council is moving towards developing a Local Area Energy Plan. They are using a firm called 'Energy Systems Catapult' (Birmingham based, 250 employees) which has a very interesting website.

Among the district-wide issues that will be investigated are renewable energy generation, electric vehicle charge points, building improvements, and heating systems.

I anticipate development work in collaboration with our Parish Council. Plan completion is targeted for 9 months hence.

3) Helping Villagers with Disabilities

Lancaster City Council is stepping up its campaign to help local residents with disabilities to remain living independently, warm and safe in their own home.

Grants are available for a wide range of adaptations. Contact Disabled Facilities Grant team is on 01524 582610 or hiaenquiries@lancaster.gov.uk.

4) Heysham Nuclear Power Station

I am on the Community Liaison Group and have attended a recent meeting. This is of interest because (a) a number of villagers work at the power station -- and (b) occasionally high level waste passes nearby overnight by rail, on its way to Sellafield. (There is no solution yet to the long-term storage of high level waste in the UK.)

Heysham 1 & 2 are ageing units but expect to be supplying power till March 2026. It is expected that the site will then be used for a number of new small modular reactors.

Jobs are intended to continue

Cllr Tyldesley

Climate emergency local plan, to include an intention to get developers to build houses that are more efficient and carbon efficient. This has been knocked back by the government under technicalities regarding planning.

Action Cllr Tyldesley to send round information on this and encourages support for the local plan proposals.

Cllr Tyldesley is now the City councillor rep for AONB.

3254 /1950 ADJOURN THE MEETING TO ALLOW PUBLIC PARTICIPATION

Rumble strips - to be addressed on the agenda at 3260/1956
